Earn with Free AI Tools

Use free AI chat and Canva to deliver real services faster — honestly.

Honest note: nobody can promise how much you will earn. Results depend on your effort, skills, time and luck. Never pay anyone who "guarantees" income.

The idea

AI tools do not earn money by themselves. They help you work faster so you can offer services people already pay for. You still check, edit and take responsibility for the result.

Services you can offer

Service	How AI helps	Who buys
CV and cover letters	Draft from the person's details; you edit and format	Job seekers, graduates
Business posters	Canva templates + Magic tools for layouts	Shops, churches, events
Social media captions	Brainstorm captions and hashtags	Small businesses
Product descriptions	Turn notes into clear descriptions	Online sellers
Translation help (English/Kiswahili)	First draft, then you correct	NGOs, sellers
Simple websites/pages	Free builders with AI layout	Freelancers, small shops

Prompts that give better results

- Give a role and a goal: "You are a CV writer. Write a CV for a Nairobi graduate applying for a sales job."
- Give details: real skills, dates, achievements.
- Ask for a format: "Use bullet points, max one page."
- Ask it to improve: "Make it shorter and more specific."

Rules for honest AI work

- Always check facts — AI can invent things.
- Never put false experience on someone's CV.
- Do not use AI to write exams or graded school work for others.
- Respect privacy: do not paste ID numbers or passwords into AI tools.
- Tell clients you use AI tools if they ask; you are selling your editing and judgement.

Start this week

1. Pick 2 services from the table.
2. Make 3 samples (your own CV, a poster for a friend's shop, 10 captions).

3. Post the samples on your WhatsApp status and Facebook with a simple price list.
4. Deliver fast and ask happy clients for referrals.
